SUGAR AGENCY

DELIVERIES OF SUGAR BY STATES DURING 1941

1.42
Su3D
1941
Reserve
The following tabulation of the monthly deliveries of sugar by states during 1941 by the primary distributors of sugar in the United States was compiled from special reports submitted by such distributors to the Sugar Agency. The information was requested last fall when it became apparent that wartime control of sugar distribution might be necessary. Similar compilations for earlier years are in course of preparation and will be issued from time to time.

The data cover the four groups of manufacturers or importers which, together, account for 100 per cent of the total distribution or usage of sugar in this country. These are the cane sugar refiners, beet sugar processors, mainland cane sugar mills, and importers of direct-consumption sugar. The last compilation of this type, made during World War I, did not include data on the distribution of such sugar produced or imported by the last two groups mentioned.

It should be noted that these data do not purport to show actual deliveries for consumption within the several states but only deliveries to those states by primary distributors. In many instances sugar shipped to consignment points in one state is later reshipped into other states for consumption. Furthermore, sugar used in certain states in the manufacture of confectionery, canned fruit, and other products is subsequently reshipped throughout the country.
